THE CONVERT CARBON PROJECT:

The Convert Carbon Project aims to develop a platform for connecting manufacturers, recyclers and community members. Combining all the services founders need to develop their business, Convert Carbon creates the perfect conditions for the success of new projects.

Convert Carbon combines the three elements necessary to take a business to the next level: Blockchain technology, a interface between parts and Convert Carbon project founding.

Convert Carbon is releasing the CARBON Token, the internal digital currency for its blockchain platform, which gives access to the platform and ensures the execution of all operations.

The CARBON tokens will be generated on the Ethereum Blockchain with an Ethereum Standard ERC20 smartcontract.

ERC20 allows the immediate issue of the CARBON tokens during the CARBON Token Sale.

For any further and more detailed information related to the Convert Carbon Project, the User shall refer to the latest version of the White Paper published on the Website.

The User understands and accepts that the development and execution of the Convert Carbon Project is solely and exclusively of the competence of the Company.

The Company shall be entirely free in its way of developing and executing the Convert Carbon Project, in particular (and among other measures) by engaging any subcontractors it would deem necessary to perform the entire or partial development and execution of the Convert Carbon Project.

The scope of the development work will be dependent on, and triggered by, the amount received in cryptocurrency as result of the CARBON Token Sale.

The User understands and agrees that, for the purpose of the development and execution of the Convert Carbon Project, the Company will receive a sum in cryptocurrency and/or in FIAT currecny that will cover expenses, charges and other costs that may arise in relation to the Company and/or its subcontractors as part of the development and execution of the Convert Carbon Project.

The Company will allocate the amount in cryptocurrency and/or in FIAT currency received as result of the CARBON Token Sale in accordance with the White Paper, but (within this general frame) the Company shall decide at its sole discretion how to allocate the above mentioned amount in order to develop and execute the Convert Carbon Project at its best.

The User understands and agrees that the Convert Carbon Project is still at its beginnings and will need to go through substantial development works. As a consequence, it may undergo significant conceptual, technical and commercial changes before release, the identification and implementation of which are fully and entirely of the Company's discretion.

The User is aware of the risk that even if all or parts of the Convert Carbon Project are successfully developed and released in full or in part, the Convert Carbon Project could, due to a lack of public interest, be fully or partially abandoned, suspended, remain commercially unsuccessful or be shut down for lack of interest, funds, regulatory reasons or any other reasons. Such reasons, as well as any of their consequences, shall be assessed and evaluated by the Company itself. The Company shall therefore be fully and entirely free to take any and all measures it would deem necessary or appropriate. The User understands and agrees that the purchase of CARBON Tokens carries significant financial, regulatory and/or reputational risks (including the complete loss of value of CARBON Tokens).

THE CARBON TOKENS:

Since CARBON Tokens have the nature of utility tokens that the Users can use in relation to the Services and to the Convert Carbon Project, as well as the nature of payment tokens, according to the specifications given in the White Paper.

The CARBON Tokens does not have the legal qualification as an asset token, since it does not give any rights on dividends or interest. The CARBON Token is final and non-refundable.

CARBON TOKENS ARE NOT, AND SHALL NOT BE USED IN ANY WAY AS, EQUITY, ASSETS, BONDS, SECURITIES, DERIVATIVES OR ANY OTHER FINANCIAL INSTRUMENTS.

CARBON Tokens are ERC20 tokens based on the Ethereum blockchain. Any information given or inferred from the above mentioned website is not, and shall not be held as, part of these T&C.

The Users understand and agree that smart contract technology is still in an early development stage and its application of experimental nature. It therefore carries significant operational, technological, financial, regulatory and reputational risks. The Users are fully aware of such risks and accept them as part of your participation to the CARBON Token Sale and Convert Carbon Project.

The User must access and use CARBON Tokens using an ERC20-compliant wallet. It is the User's sole responsibility to not lose his CARBON Tokens, in particular by losing access to the keys which allow access to the wallet and/or allowing malicious third parties to access the keys and/or the wallet.

THE COMPANY SHALL NOT BE HELD LIABLE FOR ANY LOSS OF CARBON TOKENS AND/OR OTHER DAMAGE INCURRED AS A RESULT OF THE

TRANSFER OF THE CARBON TOKENS TO THE USER'S WALLET OR LOSS OF KEY OR ATTACK ON THE WALLET.

The User understands and accepts that the purchase of CARBON Tokens does not involve the purchase of shares or any equivalent in any existing or future public or private company, corporation or other entity in any jurisdiction. Thus, the User understands and accepts that he/she/it will have no influence over governance of the Company.

CARBON Tokens can be purchased during the CARBON Token Sale directly from the Company or, after the CARBON Token Sale, at the Company or at an exchange website.

The User undertakes to solely control the address and/or the wallet used for the purchase, and shall not act on behalf of any third party, and shall not transfer the control of the mentioned address and/or wallet to any third party.

Users are not entitled to send any funds to purchase CARBON Tokens until the CARBON Token Sale has officially begun, except for the case of the CARBON Tokens presale that takes place before the general CARBON Tokens Sale and is conducted only among a limited number of especially eligible contributors as shall be defined by the Company at its sole discretion.

Users are not entitled to send any cryptocurrency to purchase CARBON Tokens after the end of the Contribution Period.

The amount of CARBON Tokens to be provided to each User shall be specified in eligible User's registered wallet on the Website upon completion of CARBON Tokens purchase.

The purchased CARBON Tokens shall be sent to the User's personal respective wallet via smart contract after the end of the Contribution Period.

In order to receive CARBON Tokens, the eligible User is obliged to strictly follow any and all requirements and procedures set forth by the Company, as shall be mentioned on the Website and/or in the White Paper or otherwise communicated by the Company to the User.

The Company shall not be held liable for inability of the User to receive or use CARBON Tokens because of User's failure to follow any of the requirements and procedures of the Company or due to any possible misrepresentations of the User.

No refunds, or any other type of repayment, of contributions of the Users shall be made in such cases by the Company.

The purchase of the CARBON Tokens by the User from the Company is final. No refunds and/or cancellations will take place.

The Company shall not store CARBON Tokens on a User's behalf. CARBON Tokens shall be stored in the User's own wallet. The User is therefore the sole responsible to ensure the correct keeping, in full security, of any and all access information relating to his wallet. The Company shall have no responsibility or liability in this context.

The User shall be solely responsible for any and all managing, use and decision linked to his/her/its CARBON Tokens.

The Company may, from time to time, implement policies restricting or strengthening verification levels by nationality, country of residence, or any other factor. This may affect the User's right to purchase CARBON Tokens or to withdraw CARBON Tokens. The User agrees to fully indemnify the Company against any losses associated with an inability to purchase, withdraw, or use CARBON Tokens based on the User's verification level.
